DETAILED ACTION

Terminal Disclaimer

The terminal disclaimer filed on 12/3/02005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US 6713067 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Double Patenting

Claims 19-29 are rejected on the ground of nonstatutory double patenting over claims 21-39 of U. S. Patent No. 6441817 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows:

The instant claims are drawn to a method involving an HSV with mutations in vhs, ICP47, ICP34.5, and UL43 (elements ABCD). Patent claim 23 is drawn to a method using a virus with mutations in vhs, ICP34.5, and UL43 (elements ACD); additional mutations are not excluded. Patent claim 29 is drawn to a method using a virus with mutations in vhs, ICP47, and UL43 (elements ABD); additional mutations are not excluded. The supporting disclosure, at column 4, lines 46-64, discusses a variety of mutations that can be combined with vhs and UL43, and includes ICP34.5 and ICP47 in the list of additional mutations contemplated. Therefore the ACD and ABD patent claims cover the 4-mutation ABCD combination, and the patent disclosure reasonably includes

Art Unit: 1648

the 4-way combination now claimed. Therefore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Claims 1, 2, 6-18, 30-40 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 44 of copending allowed Application No. 10/273348. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims to a method using HSV with mutated using a virus with mutations in vhs, ICP34.5, and ICP47 fully encompass the copending claim, which is drawn to a method using HSV with mutations in vhs, ICP34.5, ICP47, and ICP22. Applicant's arguments regarding the previous rejection are noted; however, this is a different rejection, based upon the new combination of mutations now claimed.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1648

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
